

Information Worker Solutions

Why KnowledgeCentrix?

KnowledgeCentrix provides the expertise necessary to ensure you get the maximum value from your Microsoft product investments. From zero-risk migrations to product feature optimization, we offer the solutions you need to make your workers productive and efficient.

Most businesses rely on Microsoft server technologies and productivity software to organize, produce and share information. Products, such as Microsoft SharePoint and Office 2010, enable users to collaborate in real-time, sharing documents and ideas from any location. Microsoft Office products integrate, allowing users to create, send and manage documents among different programs. The end result: you empower your average employee to be more productive.

Microsoft SharePoint Server 2010

This collaboration and content management server integrates information from multiple systems into one solution, requiring only a single sign-on for access. Out of the box, it provides a total collaboration solution for teams, individuals and businesses.

Microsoft Office 2010 Suites

The flexibility of Microsoft Office products enables businesses to solve the challenges faced by its workers. From streamlining business processes, to creating and managing content, SharePoint is seamlessly integrated with the Microsoft Office products suite.

Create a consistent user experience

Integrate familiar applications that make new programs intuitive and easy-to-use from the start; reducing the learning curve so workers can remain productive.

Increase productivity

Simplify common tasks and improve business processes with built-in workflows, communications tools and fast access to information.

Manage content efficiently

Create and deploy content, initiate approval processes and employ version controls using a web-based application with a user-friendly interface.

Extend collaboration outside the firewall

Create portals to work with customers, partners and other external users in a secure environment.

Improve business insight

Help information workers make better decisions quickly with business intelligence portals, search functionality and data integration.
